RIDE																													
WALK																													
CAR																													
PUBLIC TRANSPORT																													

- ### Using your HandsUp! Chart
- Each week, record how each student in your class has travelled to school that morning. Walk, Ride (this includes riding, scooting and skating), Public Transport, or Car.
  - We find that Wednesday works well for collecting the count. Why not assign two students to the task of making sure it is completed each week.
  - Make sure that your chart is in an accessible location for the HandsUp! Monitors to collect the data without disturbing your class too much.
  - Once all the counts have been collected, you should enter them online at [www.ride2school.com.au](http://www.ride2school.com.au) where you can see how your school is tracking and even how much CO2 you are saving by travelling actively!
  - Another great way to use the data collected is to award the class with the highest active travel rate (walking and wheeling) at assembly each week.
