RIDE																													
WALK																													
CAR																													
PUBLIC TRANSPORT																													

Using your HandsUp! Chart

1. Each week, record how each student in your class has travelled to school that morning. Walk, Ride (this includes riding, scooting and skating), Public Transport, or Car.

2. We find that Wednesday works well for collecting the count. Why not assign two students to the task of making sure it is completed each week.

3. Make sure that your chart is in an accessible location for the HandsUp! Monitors to collect the data without disturbing your class too much.

4. Once all the counts have been collected, you should enter them online at www.ride2school.com.au where you can see how your school is tracking and even how much CO2 you are saving by travelling actively!

5. Another great way to use the data collected is to award the class with the highest active travel rate (walking and wheeling) at assembly each week.
